Summary

Certified Business & Data Analyst with experience spanning analytics, automation, and cross-functional business operations. Proven success in HR, healthcare, and multi-industry financial analytics, including automating legacy processes with advanced Google Sheets formulas, AI-driven models, and custom templates—cutting manual effort by up to 40%. Skilled in Excel, SQL, Power BI, Tableau, and Generative AI, with a track record of delivering accurate, actionable insights from sensitive datasets. Adept at collaborating directly with executives, streamlining interdepartmental workflows, and driving data-informed strategic decisions in fast-paced, high-impact environments.

Technical Skills

Tools & Technologies: Excel (Advanced VBA Macros, Pivot Tables), Power BI, Tableau, MySQL, Google Sheets, Python (Pandas, NumPy), JIRA, Generative AI Platforms, LLMs, PowerPoint.

Data Analysis Skills: Data Cleaning & Preparation, Data Visualization (Dashboards & Reports), Statistical Analysis, Predictive Analytics, ETL, Dashboard Development, Report Generation, Requirements Gathering, SLAs, Document Preparation.

Soft Skills: Communication (Written & Verbal), Collaboration, Problem-Solving, Analytical Thinking, Critical Thinking, Leadership, Time Management, Adaptability.

Work Experience

Business Associate, 5 Data INC (Jul 2025 – Present)

- Report directly to the CEO, leveraging advanced analytical and AI skills to manage confidential business and client financial documents with precision and security.
- Automated legacy Google Sheets with complex formulas, AI-powered scripts, and reusable templates, reducing manual work by 40% and standardizing reporting formats.
- Designed AI-driven models and workflows to simplify complex tasks, enabling faster decision-making and saving 15+ hours per week across multiple teams.
- Conducted in-depth financial and operational analysis for diverse clients, transforming raw data into actionable insights that improved strategic planning.
- Collaborated with cross-functional teams to implement AI-assisted process improvements, boosting interdepartmental efficiency and collaboration by 25%.

Data Analyst Intern, AI Variant, Bengaluru (Healthcare Analytics) (Aug 2024 – Nov 2024)

- Executed healthcare analytics projects by developing Power BI and Tableau dashboards for hospital finance and patient data, uncovering 20% cost-saving opportunities through real-time insights.
- Performed advanced data analysis using Excel and MySQL, boosting patient turnover efficiency by 15% and preparing detailed project reports for stakeholders.
- Optimized MySQL datasets with complex SQL queries, slashing report retrieval time by 25% while meeting stringent project SLAs and timelines.
- Enhanced data integrity through meticulous cleaning and validation, reducing errors by 30% and creating comprehensive documentation, including user guides for dashboard deployment.
- Collaborated with senior analysts to refine dashboards, master advanced SQL techniques, and deliver impactful PowerPoint presentations to healthcare executives during project reviews.

Data Analyst Intern, AI Variant, Bengaluru (HR Analytics) (Oct 2023 – Jan 2024)

- Led HR analytics projects by analyzing datasets with Excel and MySQL, driving a 10% increase in employee retention and documenting actionable insights in stakeholder reports.
- Designed Power BI and Tableau dashboards to visualize HR metrics, enhancing reporting efficiency by 15% and supporting cross-functional project initiatives.

- Implemented predictive analytics and AI tools to reduce turnover by 18% in key segments, ensuring compliance with project SLAs and deadlines.
- Streamlined data processes, cutting discrepancies by 20%, and authored detailed user guides and process documentation for dashboard utilization.
- Partnered with senior analysts to validate models, troubleshoot issues, and prepare polished PowerPoint presentations for HR leadership during project updates.

Intern, Flipkart (Supply Chain And Logistics Management)

(Sep 2022 – Oct 2022)

- Gained hands-on experience in supply chain operations, including picking, packing, and sorting, providing a practical understanding of end-to-end logistics processes within a large-scale e-commerce environment.
- Developed insights into warehouse operations, logistics management, and product flow from warehouse to customer, enhancing understanding of supply chain dynamics.

Education

Bachelor Of Business Administration in Finance

(2020 – 2023)

Asansol Engineering College (CGPA 8.66)
